LEAVE MICROSOFT ALONE! We are sick of government trying to stifle competition in today's market. If companies can't work around what Microsoft has already established TOO BAD. It doesn't matter to me that Bill Gates makes billions of dollars. Free enterprise is free enterprise. Quit spending our hard earned tax money on trying to destroy what this company has spent years on creating. You are part of the reasons why people resent the government so much. We give, give and give and you take, take and take.
